

e'Pap Children's Feeding Project Newsflash April 2014

Something good to eat..... and a place to eat it!

Have you ever tried eating a bowl of porridge sitting on the floor or colouring in a picture or working out a puzzle with no table or chair?

For 35 children at the Rainbow Kidz Preschool in Smutsville they had never known anything different. This week it all changed and 8 brightly coloured tables and chairs for all were delivered to the school thanks to the generosity of e'Pap Children's Feeding Project. Joy of joys – life will be so much easier from now on.

Our project is not only about improving children's health by supplying better nutrition, but also ensuring that the children have the basics of what they really need in order to learn, develop and grow - and that includes a place to eat their e'Pap as well as the tables doubling up as a means to enjoy their lessons with all the different tasks.

The children's faces said it all. They hurriedly found a chair, sat down and with eyes closed gave thanks – not only for the yummy, nutritional e'Pap but also for tables and chairs that would make all the difference to their mornings of learning, interacting with each other and the two meals served every day. Teacher Mavis and Eunice the Cook are so delighted and grateful - it really looks like a proper, functional school now.

Every picture tells a story and it was such a delight to see the children tucking into their bowls of e'Pap which were eaten with relish - and how much easier the whole process was with their fabulous new gift.

Thumbs up to our wonderfully generous donors, who provide the money and our faithful volunteers who effortlessly transform donations into the things that are really needed to improve the lives of the more than 4,500 children who benefit from our project. Together we are making our country a better place.
